

PATENT  
Serial No. C9/414,454  
Amendment in Reply to Final Office Action of November 2, 2005

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph on page 2, between lines 14-26 of the specification with the following:

One important structure of the Internet is the World Wide Web ("Web"). The web is a collection of information formatted as hypertext-based documents (*i.e.*, web pages). A related set of web pages or documents maintained by a single web server is often referred to as a web site. This information can be distributed through computers around the world connected to the Internet. Web pages are basically a computer data file on a host operating as a web server within a given domain name (*e.g.*, TV.com). The web server receives ~~inquires~~ inquiries from clients (*i.e.*, other computers) via the Internet and downloads the web page data in the file to the client making the inquiry. The web page may comprise multiple pages of information including messages, audio and graphical information, and combinations thereof.
